Nature's beauty in colour

Hello!

I'm Marina, a surface pattern designer based in the UK. I am lucky to be surrounded by green hills, deep woods and wonderful gardens. When in nature, I feel alive and inspired by all the little details: flowers, leaves, different bugs, a blue summer sky or an angry black cloud. Nature brings me peace and joy.

Through my designs, I hope to bring some of the outdoors into your space and share some of the joy and peace I feel from being in nature.

My designs are available for licensing and I am open to collaborations.

Magical Weeds

Is it a weed? There are so many amazing flowering plants that can be considered weeds. For me, many of these plants are treasures that hold magical childhood memories. Do you remember blowing away dandelion seeds while making a wish? Or playing the loves me/loves me not game with the petals of a lawn daisy?

By the Pool - Mini Collection

Close your eyes... It's a hot summer day and you are sitting by the pool with your feet in the water. All you can hear is the play and laughter of your children playing. Can you feel the sun on your face?

Country Walks

The South of England is full of beautiful countryside walks. Public paths around farmland and meadows provide a fantastic opportunity for everyone to enjoy nature. Enjoy a peaceful walk in the sun, the beautiful clouds and all types of wild flowers and insects...

Summer Walks

In winter, sometimes I find myself thinking of those warm summer days...

Lying on a picnic blanket after lunch, feeling the warmth of the sun on my face as it filters between the tree leaves. Enjoying the variety of colours in gardens and countryside from flowers and insects. And all those long summer evenings...
